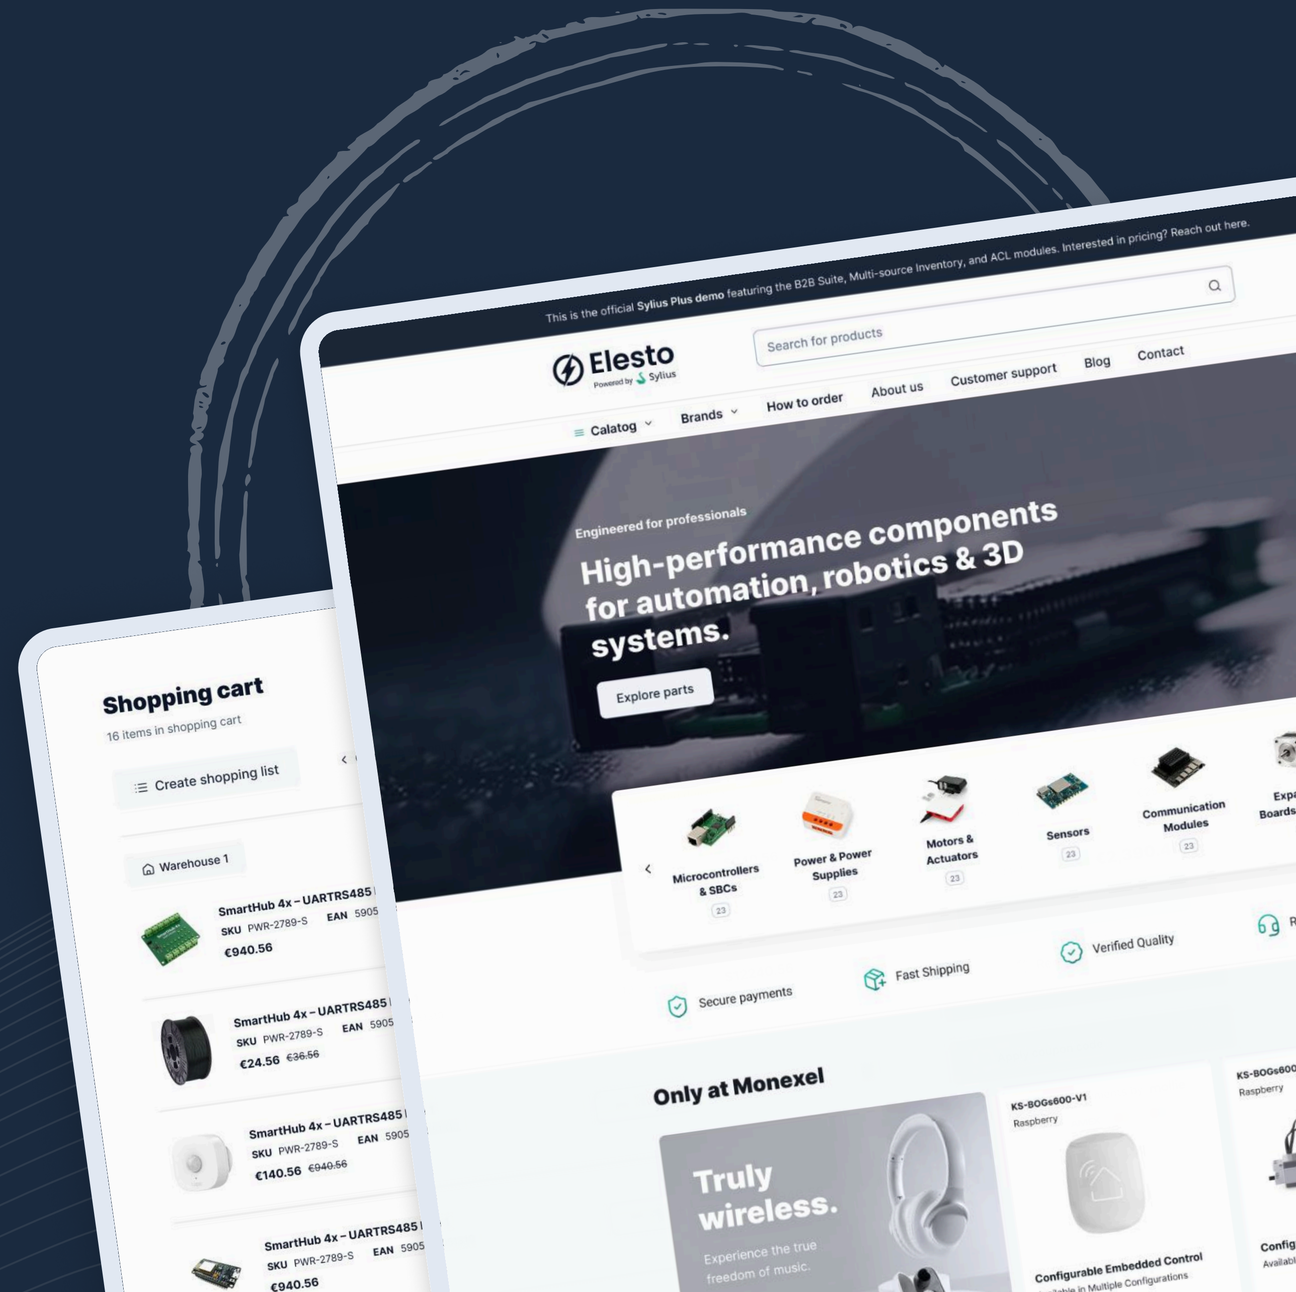
Sylius Plus Module

B2B Suite

Sylius



Why Sylius is the right choice for B2B?

#1 Symfony

Architecture built 100% on Symfony ensures full compatibility with its ecosystem. This makes onboarding new developers easy, while the solution remains stable and future-proof.

#2 Open-source

Sylius is developed as open-source software. This means access to thousands of ready-made plugins, an active community that has often already solved the problem you're facing, regular updates, and development support.

#3 Flexibility and Customization

Full control over business logic and sales processes. You can create any purchasing scenarios and integrate with the systems you choose.

#4 Modular Monolith

You decide which Sylius components to implement. You have complete control over the architecture, without unnecessary complexity.

#5 Proven scalability

Sylius handles large catalogs with ease (proof by 200,000+ products, 1,000,000+ variants). It's a solution that runs reliably even in stores developed for over a decade.

#6 API-first

Sylius offers complete API coverage, enabling easy integration with ERP, CRM, PIM, and any best-of-breed tools. The system is also ready for a headless approach.

#7 Global expansion

Multi-language and multi-currency support comes as standard, enabling rapid entry into new markets.

Expand your platform's capabilities with Sylius Plus

- **Faster time-to-market** – get your store up and selling quicker
- **Professional support (SLA)** – Sylius Team is always on your side
- **Modular licensing** – pay only for the modules you need
- **Lifetime license and full store ownership**

Organizations and user roles

 # One account – multiple users

customers can bring their entire team into one organization.

 # Team administrator

a designated person manages members and permissions.

 # Shared billing address

all invoices are issued to the company details.

 # Full order transparency

every user sees the complete organization history.

Pricing engine

 # Dedicated price lists

different terms for organizations and customer groups.

 # Fixed prices or percentage discounts

easy adaptation to contracts.

 # Tier pricing

lower rates for larger orders.

 # Full control

transparent management of complex pricing models.

Quick Shopping

 # Add products by SKU

quickly enter codes instead of searching.

 # Import from file

load an entire product list in one step.

 # Time-saving

faster placement of large orders.

Multiple shopping lists

 # Unlimited lists

parallel carts for different projects.

 # Better organization

purchases divided by department or deadline.

 # Flexible management

easy adding, editing and deleting of lists.

Re-ordering

 # Quick order recreation

one click and products return to cart.

 # No missing items

reduced risk of errors.

 # Ideal for recurring contracts

support for repeat purchases.

Additional Modules Compatible with B2B Suite

Sylius has repeatedly proven itself in demanding B2B industries such as industrial and trade, agriculture, printing, and electronics.

Examples can be found in our case studies:

- 🔗 Albeco – industrial components supplier,
- 🔗 MT Distribuzione – home security,
- 🔗 Agro-Efekt – agricultural supply,
- 🔗 PrintOclock – online printing.

Request for Quotation (RFQ)

Negotiations and personalized offers

RBAC (Role-Based Access Control)

Granular permission management

Advanced Multi-store

Multiple stores under one panel

Multi-source Inventory

Control of multiple warehouses

Product Configurator

Real-time product personalization
